

CLABSI Prevention Project

Implementation Made Simple

- ① Establish CLABSI reporting process
- ② Form the team: members from ICU medicine & nursing, infection control, others as appropriate
- ③ Review your protocol
- ④ Identify changes required & materials needed (eg. trolley, big drapes)
- ⑤ Develop education strategies & timetable for nursing & medical staff
- ⑥ Implement changes
- ⑦ Check compliance with insertion process
- ⑧ Review CLABSI rate regularly & check compliance as required
